

VirtualViewer HTML5 for Java 5.0 Readme

With this release of VirtualViewer 5, our documentation has been modified to make it easier to search as well as more up to date.

The documentation is divided into multiple parts:

NOTE: The most up-to-date documentation is available on our website:

Release Notes and Product Manuals:

<http://www.snowbound.com/support/manuals>

The following is packaged in the distributed build.

- 1) This Readme is packaged in the documentation folder of the product installation
- 2) The documentation folder of the product installation has the rest of the documentation listed in section 3 shown below. The online documentation is the most current version for this build.
- 3) Links for the files below lead to the Snowbound website pages for the most current versions of our documentation.
 - a. [VirtualViewer HTML5 for Java Administrators Guide V5.0](#) (Java specific)
 - b. [VirtualViewer 5.0 Release Notes](#) (Java specific)
 - c. [Transitioning to VirtualViewer 5.0](#) (Java specific)
 - d. [VirtualViewer Client API](#) (Java specific)
 - e. [VirtualViewer Java Content Handler API](#)
 - f. [Table for Snowbound Software supported file formats](#)
 - g. [Table for Snowbound Software supported file format descriptions](#)
 - h. [Snowbound Software Product OSS Documentation](#)
 - i. [VirtualViewer HTML5 product brochure](#)
 - j. [Table of Snowbound Software TIFF tags](#)
- 4) Samples are in the 'sample-documents' directory of the build
